

INSTRUMENTS 2005

TACOMA® MADE IN THE USA

MADE IN THE USA – powerful words that carry a lot of meaning, especially when it comes to building an acoustic guitar. At Tacoma, we do things the way you'd expect: We use all solid woods, never artificial woods or laminates in all of our instruments. We bend our own sides, cut our own tops and backs, make our own necks – all at our factory in Tacoma, Washington, U.S.A.

So when you're shopping for an instrument, compare our features and specs to anybody else on the market, and make sure that they hold up to the Tacoma standard: Innovation, Tradition, and Honest Value in a true American made instrument. Then try one of our fine Acoustic Guitars, Basses, Baritones, Mandolins, or the totally unique Papoose®, and rediscover what "Made in the USA" really means.

TACOMA – HONEST AMERICAN INSTRUMENTS.

WING SERIES
