

# Tranzamp

A C O U S T I C

model **A30**

G U I T A R A M P L I F I E R

## OWNER'S MANUAL

The A30 ACOUSTIC guitar amplifier has been designed to offer quality features and tone reproduction on par with other amps much more expensive than this affordable TRANZAMP model.

The A30 features professional input circuitry and equalization that is critical in reproducing the warmth, color and tone of an acoustic instrument. The 30 watt power rating is deceiving when it comes to the total output from this compact acoustic amp.

The custom designed 8" loudspeaker and bullet tweeter combine to enhance the mid-range character and high frequency clarity of the amplified acoustic guitar.

The rugged construction and attractive appearance of the A30 will insure the retained value of this amplifier for many years to come.

## FEATURES

**CH. 1 BALANCED** - XLR Balanced Input-Provided for use with any Dynamic microphone. Condenser mics may be used with an external phantom power adaptor.

**CH. 1 UNBALANCED** - 1/4" input for use with any Instrument level input source. The circuitry is designed to provide the best response from all current instrument pick-ups. The great tone of this acoustic amp starts here.

**CH. 1 VOLUME** - Adjusts the amount of signal from either input in Channel One. Balanced and unbalanced inputs mix together.

**CH. 2 UNBALANCED** - 1/4" input for use with any Instrument level input source. The circuitry is designed to provide the best response from all current instrument pick-ups. The great tone of this acoustic amp starts here.

NOTE : All inputs from Ch. 1 and Ch. 2 mix together simultaneously and do not cancel each other.

**CH. 2 VOLUME** - Adjusts the amount of signal from the Ch. 2 input.

**ACTIVE EQUALIZATION** - This 3 band EQ features Low and High frequency shelving EQ filters along with sweepable Mid freq. network which is adjustable to help reduce feedback. This EQ controls all inputs of the A30. The midrange gain control, when turned towards the "minus" direction operates as a variable frequency notch filter.

**REVERB LEVEL** - The A30 uses a quality spring reverb. The amount of reverb is adjusted by this control.

## REAR PANEL

**LINE OUT** - this "line level" signal from the A30's preamp can be used as a recording output or to send to a PA system.

**POWER CORD** - Always plug the TranZamp into a grounded 120 volt, 60 cycle power outlet. Never disable the ground connection of the power cord.

## SPECIFICATIONS

Power rating : 30 watts, 4 ohms

Speaker size : 8" custom loudspeaker

Dimensions : 15.5"H x 15.5"W x 9" D

Weight : 21 lbs.

## WARRANTY

- Genz Benz Enclosures, Inc. warrants the TranZamp model A30 to be free from defects in materials and workmanship for a period of 1 year from the date of purchase.
- This warranty does not cover normal wear and tear incurred from the normally designed use of the product.
- All warranty service must be performed by a Genz Benz authorized service center.
- Before returning any unit for service, a Return Merchandise Authorization (RMA) number must be obtained by calling Genz Benz at 480-941-0705.
